

## Numatic Response to COVID-19

Normally known for their vacuum cleaners (most famously the Henry vac), Numatic have urgently re-tasked Research & Development Teams, Production Specialists and Manufacturing Teams to work across projects in support of the response to the COVID-19 crisis.

The Numatic Teams have been working around the clock to provide support to the Government and the NHS, including the development and provision of face masks, face shields and free loan of cleaning equipment for NHS cleaners.

Simon Lawson, MD of Numatic International, said: "I cannot thank the Team enough here at Numatic for their efforts in getting an additional product into production, in unprecedented times, for our NHS."
